

# Who do you trust for your clinical accessories?

Connecting the patients you care for with the equipment you trust

Securing clinical accessories for your medical equipment can be complicated and costly. Sourcing from multiple suppliers can lead to inefficiencies, poor quality, incompatibility, and a lack of visibility into the true cost of ownership. If a product breaks when utilizing alternative suppliers, it is not always clear who to contact for repairs, or if that supplier still carries the part.

GE Healthcare offers a comprehensive clinical accessories portfolio, verified for compatibility – that meets the highest standards of performance and reliability. Our line of clinical accessories are compatible for use with your GE Healthcare monitoring solutions, anesthesia and respiratory care, maternal-infant care and diagnostic cardiology equipment. Now you can purchase the same high-quality accessories that came with your device directly from GE Healthcare throughout the device's lifecycle. Make GE Healthcare your single trusted, reliable source of clinical accessories.
