

Tube Watch

Reduce disruptions. Enhance care.

Tube Watch from GE Healthcare delivers peace of mind by remotely monitoring and predicting tube failures, including components in the Xray generation chain — so you can get them fixed before any disruption occurs. Here's a look behind the numbers for Tube Watch.

The Problem

>40

Average lost scans due to an unexpected tube failure¹

1-2 days of unplanned system downtime when a tube fails

Our Solution

3-20 Days advance notice of tube failure²

100%

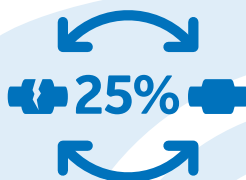

Warranty on Tube uptime³

↓ 75%

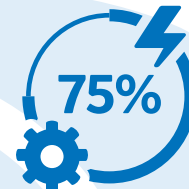

Reduction in tube-related downtime⁴

Results

from 1000+ CT systems activated with Tube Watch during a 3-month study period⁵

Of at-risk systems led to **Xray tube proactive replacement**, including components from the Xray chain

Of at-risk systems led to **proactive parts replacement or high voltage maintenance**⁶

High accuracy alerts for the whole Xray chain, enabling ability to fix system proactively at the most convenient time, avoiding disruption in care

unplanned downtime reduction for either a failure of the Xray Tube or Xray chain

1 Primary market research conducted by GE Healthcare with 10 customers.

2 Days of advance notice will depend on type of failure mode.

3 Customer needs to have a tube coverage contract with GE to avail the 100% warranty on uptime.

4 Results may not be typical of every customer's performance.

5 10-week GE Healthcare field study conducted in Europe fall 2020.

6 Examples of parts that can be replaced: High Voltage tank, KV/mA controller board, inverter, High Voltage cable, High Voltage transformer for rotor power supply.
