

eDelivery

What is it?

eDelivery is an all-in-one tool for secure and easy access to new software, upgrades, updates, and licenses from GE Healthcare that keeps your systems up-to-date.

What does it do?

Whether you are managing GE Healthcare systems or IT for your healthcare organizations, eDelivery offers a fast, safe and easy-to-use channel to deliver software, security patches, upgrades and digital licenses worldwide. With less time wasted to keep your systems up-to-date, you have more time to focus on patient care.

Privacy and security

Security is a top priority. Communication is secure and never shared. All interactions are fully protected by GE Healthcare's proprietary medical-grade security standards.

How do I get started?

1. Contact your GE Healthcare representative to learn about eDelivery and how to enable direct delivery of your software to your devices for applicable products.
2. Activate your GE Healthcare eDelivery portal access and login as provided in your welcome email.
3. Download from the eDelivery portal and install on your device or for applicable products receive software and licenses directly on your devices.

Simplify

With the easy-to-use eDelivery portal, software and licenses can be downloaded manually or for applicable products, software and licenses can be directly eDelivered to the device, eliminating software delivery interruptions due to shipping delays.

Improve productivity

eDelivery of new software, updates and licenses means less time waiting for on-site technicians and more time spent with patients. In addition, clinical software updates enhances the system performance.

Keep your systems current and up to date

eDelivery provides easy and secure access to software, keeping your systems up-to-date and at the forefront of current technological innovation.

Growth & sustainability

By eliminating physical media, you eliminate the need for packaging, fuel and storage space.

Maximize security

eDelivery enables fast and secure access to security updates, operating system updates, bug fixes and associated items at the touch of a button.
