

Giraffe OmniBed Carestation

Combining technology
and experience to send
babies home healthy

Shown with the CARESCAPE™ ONE patient monitor.

Healthy growth and development is a journey

The first moments of a baby's life are filled with joy. Yet, in those instances when a newborn requires extra care in the NICU, it can also be a time of anxiety for parents and one of intensity for caregivers.

At GE HealthCare we are committed to making the path toward sending babies home as safe, comfortable and quick as possible through advanced technology. Designed with babies, and their families in mind, the Giraffe™ OmniBed™ Carestation™ creates a controlled, protected microenvironment for peaceful, fast healing—bringing babies one step closer to caregivers' expertise, their parents' embrace and to going home healthy.

From delivery to discharge, the Giraffe OmniBed Carestation is designed to address the changing and complex demands of the NICU, providing:

- Comfortable, consistently controlled thermal environments
- Continuous warmth during transport with the addition of the Giraffe Shuttle™
- Neurodevelopmentally supportive, family-centered care solutions
- Improved patient access and visibility
- User-friendly, high tech features and functionality
- Reliable clinical performance

Everything you need, every step of the way

GE HealthCare wrote a new chapter in high acuity neonatal care when it pioneered The Giraffe family—including its market leading Giraffe OmniBed combination incubator and radiant warmer. The next generation carestation adds to the Giraffe story, building on the first-of-its-kind product portfolio and combining technology with expertise to promote natural healing.

Empowering caregivers' expertise

In critical care environments when every second counts, technology needs to work for you. The Giraffe OmniBed Carestation simplifies and enhances the clinical workflow by providing caregivers the intuitive and reliable neonatal solution they need to manage babies toward better health.

The best of both worlds

A full-featured incubator and radiant warmer in one, there is no other bed like this one.

1. As an incubator, one touch activation of the Air Boost protects the baby from heat loss when either panel or porthole are opened to support thermal stability.
2. When operated as a radiant warmer, the baby receives uniform heat, without warming the caregiver. As an incubator or warmer, the Giraffe OmniBed Carestation combines advanced technology, exceptional performance and innovative design to provide enhanced care for the baby every step of the way.
3. Low noise fan and comfortable pressure-diffusing mattress offer babies the soothing environment they need to rest and heal. The pressure-diffusing mattress reacts to the impact of the baby's body, reducing pressure points while decreasing motion and disruption, and increasing comfort. The patented translating Baby Susan™ rotating mattress enhances productivity by allowing the caregiver to easily position the baby for clinical procedures, improving their efforts to get it right the first time and reducing unnecessary baby stimulation.
4. Large color display (10.4 inches) and touchscreen user interface helps caregivers streamline their workflow while monitoring and controlling the baby's environment.
5. Customized screens contribute to the personalized, patient- and family-friendly care environment while providing continued visual monitoring.
6. Hands-free alarm silence allows caregivers, with a wave of their hand, to turn off the alert without requiring additional caregiver response—or disturbing the baby.
7. Bonding with the baby is effortless whether in closed bed mode through the port holes or open panel access, or open bed mode with its robust canopy lift. Connectivity capabilities allow communication with electronic healthcare records and hospital information systems; it is equipped for future updates and upgrades.

Enabling parents' embrace

When it comes to a baby's growth and development, parental touch—and peace-of-mind—can make all the difference. The Giraffe OmniBed Carestation gives parents the access and assurance they need to nurture and guide their baby through the journey of life's first critical moments.

Babies are our future, and we'll do everything we can to be sure we're helping them thrive from day one.

The Giraffe OmniBed Carestation is just one way we're able to do just that. It seems so simple, but means so much.

GE HealthCare works with caregivers and parents to help babies grow, develop and go home healthy.

We are on this journey together!

GE HealthCare

About GE HealthCare Technologies Inc.

GE HealthCare is a leading global medical technology, pharmaceutical diagnostics, and digital solutions innovator, dedicated to providing integrated solutions, services, and data analytics to make hospitals more efficient, clinicians more effective, therapies more precise, and patients healthier and happier. Serving patients and providers for more than 125 years, GE HealthCare is advancing personalized, connected, and compassionate care, while simplifying the patient's journey across the care pathway. Together our Imaging, Ultrasound, Patient Care Solutions, and Pharmaceutical Diagnostics businesses help improve patient care from diagnosis, to therapy, to monitoring. We are an \$19.6 billion business with approximately 51,000 colleagues working to create a world where healthcare has no limits.
