Vscan*

Version 1.1

imagination at work

healthymagination

Vscan is a pocket-sized visualization tool providing black and white anatomic and color-coded blood flow images in real time. It can easily be integrated into physical examinations allowing physicians to see what they feel and hear. The images are generated based on ultrasound technology.

Vscan is pocket-sized and helps enable personalized use at the point of care. It will be used by physicians, or by other qualified healthcare professionals acting under the supervision/prescription of a physician, who are interested in enhancing the way patient examinations are done today.

Dimensions and Weight

- Display unit: 135 x 73 x 28 mm
- Probe: 120 x 33 x 26 mm
- Weight (unit and probe): 390 g
- Display: 3.5 inch, 240 x 320 pixels resolution

Imaging

- Black and white mode for displaying anatomy in real time
- Color-coded overlay for real-time blood flow imaging
- Field-of-view for black and white imaging: up to 75 degrees with maximum depth of 24 cm
- The color flow sector represents blood flow within an angle of 30 degrees
- Broad-bandwidth phased array probe: from 1.7 to 3.8 MHz
- Total scan time up to one hour with fully charged battery

User Interface

- The navigation wheel with minimized number of keys provides an intuitive thumb-controllable user interface
- AutoOptimize adjusts gain for all depths automatically
- AutoCycle automatically detects full heart cycle for easy and fast review or storage
- Presets simplify optimized settings for imaging different organs
- Voice recordings can be stored as part of each examination – loudspeaker allows replay from device

Clinical Applications

- Cardiac
- Abdominal
- Urology
- Fetal/OB
- Pediatric

- Selected peripheral vascular applications
- Thoracic/pleural motion and fluid detection

Measurements

- Distance measurement on-board of Vscan device
- Distance and area measurements at PC with Vscan gateway software installed

Data Storage

- Vscan data are stored on microSD or microSDHC card upgradeable to 32 GB
- Data are stored in generic formats: jpg for still frames, mpg for loops, wav for voice recordings
- Data are stored in examination folders
- All data can be recalled via gallery function

Docking and Charger Station

- Universal power supply with 100-240 V~ 50/60 Hz and global plugs (NEMA, BS, AS/NZS, Europlug)
- USB connection to PC (USB 2.0)
- Separate holder for convenient placement of probe
- Recharge time for device battery: 1 hour for 90% battery capacity

Vscan Gateway Software*

The Vscan device comes with its own PC software, which provides a gateway between Vscan, customers' PC tools and GE hotline service.

- Stored Vscan data can be viewed and interpreted on PC
- Basic distance and area measurements
- Images with those measurements can be stored back onto the device into the original exam folder
- Offline adjustment of contrast and brightness settings
- Patient data, including name, ID, birth date, can be added to exam information
- Image annotation
- Video controls for clips like play and pause, or back and forward stepping
- Playback of recorded audio files
- Data export into Microsoft Outlook e-mails, to hard disk, any compatible media or shared folders in network for long-term storage or easy access to other applications
- Exports can be executed for selected images or selected exams
- Folders can be mounted for deploying gateway tools on stored data

- Fast data finding with filter or sort function for exam date, patient name or ID
- Vscan and gateway software diagnostic tools
- Software updates for the gateway software and the Vscan device may immediately be available if the PC with installed gateway software is connected to internet
- With internet connection, GE's service hotline is on-line available – remote diagnostics and even update installations can be enabled

* **PC Requirements for Installing Vscan Gateway Software**

Operating system:

- Windows XP Professional SP2 or later
- Windows Vista
- Windows 7 32-bit and 64-bit versions
- Windows 7 running in VMware Virtualization on Mac OS X 10.6

Minimum hardware configuration:

- CPU: Pentium 4 (2.4 GHz) or Pentium M (1.6 GHz)
- RAM: 1 GB
- Disk space: 700 MB on system partition; 200 MB on partition where program is installed
- Graphic resolution: 1024 x 768
- Graphics board: DirectX 9.0c compatible
- Audio output for loudspeakers or earphones
- At least one USB port (2.0) available
- Pointing device mouse with left and right buttons
- Alphanumeric keyboard
- CD/DVD player

Installed software:

- Windows Media Player version 10 or higher
- Adobe Acrobat Reader 4.0 or higher (for on-line help function)
- Internet Explorer version 7 or higher
- Microsoft Outlook (for sending e-mail from Vscan gateway software)

Vscan Web Portal

- Vscan customers can register at Vscan portal, which entitles them to full content including education materials for product and clinical applications
- Especially non-traditional ultrasound users will benefit from on-line education providing instruction on how to apply Vscan in different clinical situations
- Animation rich educational material
- Each education module includes information about basic anatomy, recommendations for probe placement, and imaging and pathology
- Device and gateway software registration will provide product activation codes. With the supplied customer information, GE is enabled to secure requested maintenance or to submit desired information
- Tips, news, contact information

Standard Configuration

Following components are included in standard configuration:

- Vscan scanner with probe
- Docking station
- USB cable
- 4 GB microSD memory card
- One rechargeable battery
- Global AC adapter with interchangeable plugs (USA and China, EU, UK, Australia)
- Soft case/protection case
- Access to Vscan web portal with entitlement to full on-line education package
- Vscan gateway software
- Gel (60 g bottle) – not available in all countries

Safety Conformance

Safety classification:

- Vscan is an internally powered device with type BF applied part, according to clause 14 of IEC60601-1:1988
- Its AC adapter is class II device, according to clause 14 of IEC60601-1:1988

Vscan and accessories meet:

- EMC requirements of EN55011/A1/A2:2002 Class B
- IEC60601-2-37/A1/A2:2005
- IEC60601-1/A1/A2:1995
- IEC60601-1-1:2000
- IEC60601-1-2/A1:2004
- IEC60601-1-4 /A1:1999
- IEC60601-1-6:2006
- UL60601-1:2003
- CAN/CSA C22.2 No 601.1-M90
- NEMA UD3:2004
- European Medical Devices Directive (MDD) 93/42/EEC as amended by 2007/47/EC (CE Mark)

General Electric Company, doing business as GE Healthcare.

About GE Healthcare:

GE Healthcare provides transformational medical technologies and services that are shaping a new age of patient care. Our broad expertise in medical imaging and information technologies, medical diagnostics, patient monitoring systems, drug discovery, biopharmaceutical manufacturing technologies, performance improvement and performance solutions services help our customers to deliver better care to more people around the world at a lower cost. In addition, we partner with healthcare leaders, striving to leverage the global policy change necessary to implement a successful shift to sustainable healthcare systems.

Our “healthymagination” vision for the future invites the world to join us on our journey as we continuously develop innovations focused on reducing costs, increasing access and improving quality around the world. Headquartered in the United Kingdom, GE Healthcare is a unit of General Electric Company (NYSE: GE). Worldwide, GE Healthcare employees are committed to serving healthcare professionals and their patients in more than 100 countries.
