

CARESCAPE Monitor B450
Connecting intelligence and care.

Keeping the flow of vital data moving.

The CARESCAPE* Monitor B450, a compact bedside monitor with surveillance flexibility, is well-suited for all flexible acuity care areas where size and portability are a concern, including emergency departments, recovery rooms, and step-down units.

Its wireless capabilities and portable design match the unique needs of high-acuity patients during intrahospital transport and stay with your patient virtually anywhere, giving you continuous patient monitoring every step of the way.

In combination mode, the CARESCAPE Monitor B450 enables early mobility of telemetry patients and facilitates a smooth transition from high-acuity units to lower-acuity areas.

Uninterrupted vital data is key.

The wireless and highly portable design of the CARESCAPE Monitor B450 supports uninterrupted patient monitoring and data continuity. When used with the CARESCAPE Patient Data Module and the CARESCAPE Gateway, the vital data can be automatically synchronized and merged, avoiding interruptions in the electronic patient record.

Intelligence across the hospital.

The CARESCAPE Monitor B450 is part of a complete modular platform of monitoring solutions that work together across the hospital for reliable data continuity to support care area workflow and the clinical excellence you demand.

Developed by clinicians for clinicians, the CARESCAPE platform is designed to reduce the learning curve with an intuitive Linux-powered user interface.

Clinical excellence of the CARESCAPE Monitor B450 accommodates a multi-parameter module with an additional single-width module slot to customize for patient- or care-area-specific monitoring needs.

Easy access to your EMR, lab, MUSE* cardiology information system, or other sources, to support fully informed decisions and workflow at every stage of patient care.

For more information about the CARESCAPE Monitor B450 and the entire portfolio of CARESCAPE modular monitors, please contact your GE Healthcare representative.

Configurable alarm settings can be adapted to your care area needs, helping reduce alarm fatigue and supporting a restful patient environment.

About GE Healthcare

GE Healthcare provides transformational medical technologies and services that are shaping a new age of patient care. Our broad expertise in medical imaging and information technologies, medical diagnostics, patient monitoring systems, drug discovery, biopharmaceutical manufacturing technologies, performance improvement and performance solutions services help our customers to deliver better care to more people around the world at a lower cost. In addition, we partner with healthcare leaders, striving to leverage the global policy change necessary to implement a successful shift to sustainable healthcare systems.

Our “healthymagination” vision for the future invites the world to join us on our journey as we continuously develop innovations focused on reducing costs, increasing access and improving quality around the world. Headquartered in the United Kingdom, GE Healthcare is a unit of General Electric Company (NYSE: GE). Worldwide, GE Healthcare employees are committed to serving healthcare professionals and their patients in more than 100 countries.
